A mark of wholesome meat. Sound, color, 16-mm., 18½ minutes.

America's housewives are familiar with the purple stamp on meat carcasses that says and means the meat is U.S. inspected and passed for whole-

someness. This USDA stamp of approval should also be noted by consumers when buying canned and packaged meats and meat products in the supermarket. This film shows what it takes to earn the right to display the "stamp of approval" on the package. Under watchful eyes of Federal meat inspectors of stockyards and processing plants, chemists, microbiologists, bacteriologists, and histopathologists in USDA laboratories, American and foreign meats must attain rigid standards before receiving the mark of wholesome meat. Cleared for TV.

Poverty in rural America. Sound, b/w, 16 mm., 28½ minutes.

This documentary gives a dramatic glimpse of "Hidden Americans," the 16 million rural poor who have been bypassed in this Nation's drive toward affluence, and yet are seldom seen because of their isolation. The film takes you where they live—into the mountain hollows, to the end of the rutted dirt roads, and into the bypassed communities. They tell their own story of their problems, their privations, their hopes. It also shows what communities are doing with Government help to solve their own problems—where rural people with a will are moving to overcome their problems with pre-school education, tutoring, job training, industrial development, and self-help projects. TV cleared.

This land is ours. Sound, color, 16 mm., 28¼ minutes.

Our land is vast and varied, rich and productive, but one-third of the privately-owned fields, pastures and woodland suffer from abuse and neglect. Natural disaster each year strikes many thousands of highly productive farms. We learn how land and water resources are rebuilt and strengthened as individuals and communities utilize financial and technical help through the Agricultural Conservation Program (ACP). We see the problems on the land, the work in progress, and hear the story from the people taking part in ACP special projects in New Mexico, New York, Minnesota, Oregon, South Carolina, Oklahoma, Ohio, and Kentucky. TV cleared.

BULLETIN OF THE MONTH

Money-saving Main Dishes Home and Garden Bulletin No. 43

Bulletin suggests ways to stretch food dollars by using economical foods in balanced meals. There are recipes and suggestions for about 150 money-saving main dishes. Additional suggestions are given for lunch-box meals.

FARMERS' BULLETINS

Commercial growing of sweet corn.
(F 2042) 18 p. 15¢.

Revision discusses the following requirements for growing high-yielding, high-quality sweet corn: Adaptation, varieties, soil management, planting, irrigating, weed control, harvesting, and pest control.

Growing safflower—an oilseed crop.
(F 2133) 13 p. 10¢.

This revised edition discusses uses, adaptation, economic factors, varieties and cultivation methods.

Facts for prospective farmers. (F 2221) 22 p. 15¢.

This publication is primarily for the person with little or no farming knowledge or experience who expects farming to provide the major part of his and his family's income. Also for young farm families who have just begun to farm on their own; or who lack adequate resources for their present operations; or who are considering a move to another region with which they are not familiar.

HOME AND GARDEN BULLETINS

Money-saving main dishes. (G 43)
46 p. 20¢.

See Bulletin of the Month.

Growing flowering perennials. (G 114)
22 p. 15¢.

Describes and tells how to grow perennials (flowering or foliage plants whose roots live from year to year).

Trees for shade and beauty: Their selection and care. (G 117) 8 p. 10¢.

This bulletin discusses the selection of the right tree, caring for trees, and replacing lost trees around homes and along city and village streets.

MISCELLANEOUS PUBLICATIONS

A consumer's guide to USDA services. (M 959) [49] p. 20¢.

This publication gives up-to-date information on the wealth of knowledge developed within the Department over the past 100 years that is available to you, the consumer, from the USDA.

Storage shed for fertilizer 40 ton capacity, plan No. 5966. (M 1021) 1 sheet. 5¢.

Information given on how to build a dry, convenient storage shed for bagged fertilizer; taking into consideration weather tightness, and resistance to corrosion when locating and building the shed.

Boat landing, plan No. 5975. (M 1022) 1 sheet. 5¢.

This all-weather dock for a small boat is designed for use in a sound where waves do not exceed 3 feet and the tide is normally 2 to 3 feet. It is built to withstand winds of hurricane force, but it is not suitable for a river or lake where massive ice floes can cause structural damage.

Circular concrete manure tank, plan No. 5984. (M 1023) 1 sheet. 5¢.

Storage of slurries of dairy cattle, poultry and swine; and conveyors of semi-liquid material are discussed.

Potato storage 60,000 cwt. door-per-bin, plan No. 5979. (M 1024) 1 sheet. 5¢.

This potato storage is designed for storing and packing table stock potatoes. It can also be used for seed potatoes and for potatoes to be processed into chips, granules, flakes, frozen french fries, or similar products.

Irrigation pipe trailer, plan No. 5942. (M 1025) 1 sheet. 5¢.

Lightweight trailer, 36 feet long, designed to haul 30- or 40-foot sections of pipe for portable sprinkler systems.

Cattle feeding rack for hay and silage, plan No. 5925. (M 1027) 1 sheet. 5¢.

This portable slanted-bar feeding rack was developed for feeding roughage to dairy cattle in pastures or open lots.

Broiler house pole construction, plan No. 5972. (M 1028) 1 sheet. 5¢.

House is designed to: Reduce winter condemnations, winter feed consumption, winter fuel costs, and summer deaths from heat prostration.

Saddle horse barn, plan No. 5994. (M 1029) 1 sheet. 5¢.

This structure is easy to build, pleasing in appearance, and designed for long life and low-cost maintenance because it is well-anchored, pole-type construction.

It happens every noon. Sound, color, 16-mm., 13½ minutes.

. . . in *all* schools that take part in the National School Lunch Program—a good, “type-A” lunch. Providing from a third to one-half of the student’s daily needs, a nutritious meal helps a child stay alert, even enthusiastic about school, and provides energy that will extend far beyond the lunch period. Yet, almost two-thirds of the millions of school children across the country do not participate in the program. This film is intended to awaken their parents, and communities, to the awareness of the school lunch program and to take action to see that every child takes advantage of it by getting a daily, well-balanced, midday lunch.

How To Buy Eggs by USDA Grades and Weight Classes Leaflet No. 442

Folder gives timely tips on buying eggs: Grade (refers to interior quality); size—weight classes (refers to minimum weight per dozen); size and price (refers to prices that vary for the same grade, depending on the supply). Photos of grade shields are included.

FARMER'S BULLETINS

Strawberry diseases. (F 2140) [27] p. 15¢.

This revised bulletin discusses the diseases of the entire plant and prevention; root diseases; soil fumigation; foliage, bud, and flower diseases; berry diseases; and acceptable residue tolerance for fungicides.

Foot rot of sheep. (F 2206) 16 p. 20¢.

This revision explains the cause, spread, signs, detection, eradication program and prevention of this costly disease, emphasizing that it is easier to prevent than to eradicate.

LEAFLETS

Production of turnips and rutabagas. (L 142) Folder. 5¢.

This revised folder gives information regarding the climatic, soil, and fertilizer requirements; varieties, seeding and cultivation, diseases and insects—and their control; harvesting, marketing, and storage.

Anaplasmosis in cattle. (L 437) 4 p. 5¢.

Revised bulletin defines anaplasmosis as a disease caused by microscopic parasites that live in red blood cells of cattle. Tells what it does, how it spreads, treatment, and precautions to be taken to prevent outbreaks.

How to buy eggs by USDA grades and weight classes. (L 442) Folder. 5¢.
See Bulletin of the Month.

Planting black walnut for timber. (L 487) 8 p. 5¢.

Some basic principles are given and explained that are necessary to produce quality timber. Places where technical information can be obtained are suggested.

Evaluation of malathion, synergized pyrethrum, and diatomaceous earth on shelled corn as protectants against insects . . . in small bins. (MRR 768) 10 p.

MISCELLANEOUS PUBLICATIONS

Food costs, retail prices, farm prices, marketing spreads. (M 856) [16] p. 10¢.

This publication summarizes the major trends through 1965 in farm and retail prices of food, marketing charges, and the relation between food costs and consumer income.

A house-framing system for low-cost construction. (M 1020) 18 p. 15¢.

Design for minimum amount of materials, select materials for maximum economy, and reduce the amount of hired labor needed are the three major ways that a builder can reduce the cost (cash outlay) for a structure. The low-cost frame described in this bulletin demonstrates the use of all of these concepts.

Roadside stand, plan No. 5983. (M 1032) 1 sheet. 5¢.

This 8- by 16-foot roadside stand is designed to permit the operator to display fresh produce in an attractive, clean, and orderly manner.

1½ story dwelling, plan No. 7179. (M 1034) 1 sheet. 5¢.

This house has the charm of early New England Cape Cod architecture and meets the needs of modern living. Planned to be constructed in stages, the basic house is a complete unit in itself.

Cattle dipping vat & inspection facility, plan No. 5940. (M 1035) 1 sheet. 5¢.

This facility is designed for the inspection and treatment of cattle infected by or exposed to cattle scabies, mange, ticks, lice, screwworms, or other ectoparasites. It may be used on farms, ranches, feedlots, stockyards, or at auction markets.

Farrow-to-finish swine unit, plan No. 5993. (M 1036) 1 sheet. 5¢.

This construction is suitable for the production of swine by either of two management systems. Pigs can be farrowed, nursed, and finished in separate buildings on a time-scheduled program, or they can be produced on a farrow-to-finish system in the same pen.

Free-stall dairy system for 101 cows, plan No. 5985. (M 1037) 1 sheet. 5¢.

Two men can operate this free-stall system on a year-round basis, but only one man is required to handle the dairy during weekends and vacations.

5-bedroom rural dwelling, plan No. 7181. (M 1038) 1 sheet. 5¢.

This house, with its traditional New England style, is especially popular in the northeastern and middle eastern parts of the United States.

A bibliography on marketing woody plants and related nursery products, 1944-65. (M 1039) 23 p. 20¢.

Listing of published material on floriculture and ornamental horticulture.
